What's New in the English Question Answering?

==== English Question Answering
==== The English Question Answering (EQA) application is designed to help you understand questions and answers in English. This application provides an answer to a question that you write. In addition, this software provides a set of questions from which you choose a question to be answered. The answers to questions that you choose are then displayed. The software can be used to test your English and to help you improve it. In addition, it can be used to study and test your English. How does the EQA software work?
==== The software will first find the correct answer by using the natural language processing methods to understand the question and the context. Then it will provide the answer to your question. You may ask a question, for example, "What is the currency of Albania?", and it can answer the question. Or, you may ask a question, for example, "How do I explain my family member?", and it can provide an answer to this question. ![QA Tutorial]("SIRIUS QA TUTORIAL") How to run the application? ===== 1. [Click here to install the application]("SIRIUS QA INSTALLATION GUIDE") 2. Install the application, which will automatically be displayed in the Start menu. 3. Click on the program name to start the application. You can select the program from the Start menu. 4. The program will automatically determine the language that you want to use, and you can select that. You can also select the option of language learning and testing. 5. The questions and the answers are displayed. The answer is the text in the box. ![QA Tutorial]("SIRIUS QA TUTORIAL") Useful features of the application
